From Omnitek's 2010 debut on the Patent Scorecard:

*"Newcomer Omnitek Partners LLC (Bay Shore, New York, USA) debuts on the Aerospace & Defense Patent Scorecard™ at #23. Omnitek is said to develop a wide range of products for both military and commercial applications, however their recent patenting is primarily related to aircraft equipment and weapons related with a scattering of others – namely energy related. Omnitek shows an above average industry influence at over of 40% more than the industry average and upon further investigation it is their few energy related patents that are receiving the majority of their recent citations.. It may well be that in time Omnitek moves into the Multi-industry Patent Scorecard with no real focus or specialty."*
