

## Aerospace & Defense Patent Scorecard

Newcomer Omnitek Partners LLC (Bay Shore, New York, USA) debuts on the Aerospace & Defense Patent Scorecard™ at #23. Omnitek is said to develop a wide range of products for both military and commercial applications, however their recent patenting is primarily related to aircraft equipment and weapons related with a scattering of others – namely energy related. Omnitek shows an above average industry influence at over of 40% more than the industry average and upon further investigation it is their few energy related patents that are receiving the majority of their recent citations.. It may well be that in time Omnitek moves into the Multi-industry Patent Scorecard with no real focus or specialty.

AEROSPACE & DEFENSE FROM TOP TO BOTTOM, BY TECHNOLOGY STRENGTH

<a href="#">A Look at the Leader</a>   <a href="#">Stock-Market Performance</a>									
Monday, July 26, 2010									
Below, companies and private research firms are grouped by their Patent Board technology strength ranking which is based on the scale, quality, impact, and nearness to core science of a company's patent-based intellectual property. This overall strength rating factors in both qualitative and quantitative aspects of a company's patent portfolio. The charts help to spot the leaders in each group and across the board. All indicators based on 13-week rolling averages.									
PATENT BOARD'S RANKING MEASURES:									
SCIENCE STRENGTH: An aggregate rating measuring the degree to which a company's portfolio is linked to core science.					TECHNOLOGY STRENGTH: An aggregate rating measuring the overall quality of a company's patent portfolio.				
Tech strength	Company/concern	Symbol	Patents granted	Science strength		Industry impact	Research intensity, 1=avg.
